Location: Palani, Dindigul – 624613, Tamil Nadu

PROFESSIONAL SUMMARY

Second-year B.Tech IT student at M. Kumarasamy College of Engineering with a 8.2 CGPA, building real-world full-stack applications using PHP, MySQL, Python, and Java. Delivered three end-to-end projects spanning campus recruitment systems, IoT-integrated safety platforms, and ISP management portals. Deeply interested in Blockchain Technology and its applications in decentralised systems and smart contracts.

TECHNICAL SKILLS

Languages: Java, C, PHP, Python, HTML5, CSS3, JavaScript

Tools & Platforms: XAMPP (Apache, MySQL), VS Code, GitHub, Git

Core CS Concepts: Data Structures & Algorithms, DBMS, Operating Systems

Areas of Interest: Blockchain & Decentralised Systems, Smart Contracts, Data Analytics, Full-Stack Development

Languages (Human): English (Proficient) | Tamil (Native)

PROJECTS

CampusConnect – Campus Recruitment Management System | PHP, MySQL, XAMPP, HTML/CSS

- Engineered a role-based recruitment portal supporting 3 user types (Student, Staff, Admin), centralising placement workflows for the entire MKCE campus.
- Designed a responsive glassmorphism UI with advanced CSS animations and a split-panel login system, delivering a modern interface consistent with industry standards.
- Built a unified layout architecture (layout-fix.css) resolving cross-page sidebar alignment issues and ensuring visual consistency across 10+ portal pages.
- Implemented secure PHP session management and role-aware redirect logic, eliminating authentication bugs across all three user flows.

SafeSteps – Intelligent Safety & SOS Platform | Python, JavaScript, HTML, CSS

- Developed a full-stack personal safety web application integrating real-time GPS tracking, SOS alerts, and journey monitoring for high-risk situations.
- Implemented a fake call functionality and smart safety logic engine, providing discreet exit options in critical scenarios.
- Enabled live location sharing with emergency contact notification, reducing response lag during emergencies.

ISP Management System – Internet Service Provider Portal | Java, HTML, CSS

- Built a Java-based ISP management platform handling customer registration, plan management, billing automation, and connection tracking for streamlined service operations.
- Designed an admin dashboard enabling real-time monitoring of active connections and automated billing cycle management.

EDUCATION

B.Tech – Information Technology 2024 – 2028

M. Kumarasamy College of Engineering, Karur | Current CGPA: **8.2**

Higher Secondary Certificate (HSC) 2023 – 2024

M. Kumarasamy College of Engineering, Karur | Percentage: **76%**

CERTIFICATIONS

- NPTEL – Internet of Things (IoT): Sensors, devices, and real-world IoT application design
- CISCO – Data Analytics Essentials: Statistical analysis, data visualization, and insight generation

- ▶ TCS iON – Industry-Oriented Online Learning: Professional development modules aligned with IT industry requirements

HACKATHONS & EVENTS

- ▶ Hackfest 2K26 – 36-Hour Hackathon: Collaborated under time pressure to design and prototype a software solution, strengthening rapid development and teamwork skills.
- ▶ Paper Presentation – Smart Protein | Kongu Engineering College, Erode: Researched and presented technical findings to an academic audience.
- ▶ Workshop – AI Trends | KPR Institute of Engineering and Technology, Coimbatore: Gained exposure to emerging AI frameworks and industry application patterns.

ACHIEVEMENTS

- ▶ Ranked 3rd in school in Class X (CBSE) – consistent academic performance from an early stage.
- ▶ Best Performer of the Year 2022–2023 (Painting) – recognised for creative excellence and discipline.

SOFT SKILLS

Cross-functional Communication • Project & Team Coordination • Creative Problem-Solving • Rapid Learning • Attention to Detail
